RE ***Tennessee Coalition of Rural Incumbent Telephone Companies and
Cooperatives Request for Suspension of Wireless to Wireless Number
Portability Obligations Pursuant to Section 251(f)(2) of the Communications
Act of 1994, As Amended
TRA Docket No. 03-00633***

Dear Hearing Officer Collier.

Pursuant to the *Order Granting Verizon Wireless' Motion to Compel, Requiring Additional Filings and Extending Interim Suspension Through September 20, 2004*, enclosed please find the requests submitted by Verizon Wireless to members of the Coalition for local number portability. Parties of record have been properly served

We note here that the BFR sent to Tennessee Telephone Company on or about October 22, 2003, was returned as undeliverable. Finally, in responding to the above-referenced Order, we reference Verizon Wireless' Confidential Exhibit A, filed in this matter on June 18, 2004, in Verizon Wireless' Supplemental Responses to the Coalition's Discovery Requests.

If you have any questions about this filing or need any additional information, please do not hesitate to give me a call at (615) 744-8572.

Sincerely,

Melvin J. Malone

Attn: Terry Wales,

Consistent with the rules of the Federal Communications Commission ("FCC"), on November 24, 2003, Verizon Wireless will begin competitive porting by offering customers local number portability ("LNP").¹ The FCC sought to simplify the task of identifying the switches in each MSA in which number portability is deployed to facilitate competitive entry.² Thus, the FCC's rules require local exchange carriers to make available, upon request by any interested party, a list of their switches for which provisioning of number portability has been requested (and therefore provided) and a list of their switches for which provisioning of number portability has not been requested.³

Verizon Wireless has reviewed our commonly licensed areas and has found the following switches and NPA-NXXs not LNP capable. Upon receipt and verification of the attached Bonafide Request, Verizon Wireless requests that all of these commonly licensed areas, NPA-NXX and switch CLLIs are provisioned for LNP service. The timeframes for conversion to LNP of any additional switches are governed by the FCC's rules and range from 30 days to 180 days, depending upon the status of the switches.

To facilitate this request, please review and list any additional switches and NPA-NXXs serving those rate centers listed on the attached form that are not LNP capable and by what date these will be LNP capable. In addition, for those switches that are not LNP capable, please indicate the status of the switch using the categories developed by the FCC in its rules (*i.e.*, equipped remote, hardware capable, capable switches requiring hardware, and non-capable).⁴ Please review and correct, if necessary the carrier name listed on the Bonafide Request. We request that you acknowledge receipt of this Bonafide Request and arrange to complete and return the attached form to the undersigned contact for Verizon Wireless within 10 days. Please call the undersigned with any questions or concerns.

Bonafide Request Form (BFR)

Purpose:

The purpose of this letter is to request the deployment of long-term Local Number Portability as defined by the FCC. Specifically, this form requests that ALL codes serving the Metropolitan Statistical Areas be opened for portability in the LERG and the NPAC and ALL switches serving these areas are LNP capable.

Attn: W Slusher,

Consistent with the rules of the Federal Communications Commission ("FCC"), on November 24, 2003, Verizon Wireless will begin competitive porting by offering customers local number portability ("LNP").²⁴⁵ The FCC sought to simplify the task of identifying the switches in each MSA in which number portability is deployed and to facilitate competitive entry.²⁴⁶ The FCC's rules require local exchange carriers to make available, upon request by any interested party, a list of their switches for which provisioning of number portability has been requested (and therefore provided) and a list of their switches for which provisioning of number portability has not been requested.²⁴⁷ Verizon Wireless requires only a list of switches and NPA-NXX codes for which provisioning of LNP has not been requested

Verizon Wireless has simplified this request by attaching a form containing a list of switches and codes for your review. This list was derived by using the LERG and comparing it to Verizon Wireless's licensed service areas. The list identifies the switch CLLI and NPA-NXX codes that Verizon Wireless believes are not yet LNP capable. Please review and update the attached form, making any necessary changes or additions to the list regarding switches and codes that have not been marked portable. Please indicate the date by which the switch and codes will be LNP capable.²⁴⁸ Any comments can be made in the column provided on the form.

Verizon Wireless requests that you review, update and return the attached form to the undersigned contact within 10 days of receipt. Please call the undersigned with any questions or concerns

Re Bona Fide Request for Number Portability ("BFR")

Dear Guy Miller,

Verizon Wireless has upgraded all of its switches for wireless number portability and plans to offer customers the ability to port in our mutual overlapping service areas as required by the FCC's rules. Previously, Verizon Wireless mailed a bona fide request for number portability to your company, consisting of a cover letter and an attached industry-developed bona fide request form. The BFR was intended to ensure that consumers can enjoy the benefits of competitive porting among wireless and wireline carriers, where requested by a competing carrier, by November 24, 2003, or a subsequent timeframe as outlined by the FCC's rules.⁹

Verizon Wireless requested information designed to determine (1) where porting is currently available, and most importantly, (2) where and when porting would be available in additional switches not currently porting capable. To this end, Verizon Wireless provided specific information regarding, among other things, the targeted rate center, NPA-NXX codes and the switch CLLI.

Verizon Wireless does not accept your response rejecting its BFR. Verizon Wireless hereby renews its original request with the same effective date triggered by that request. Specifically, Verizon Wireless rejects the following arguments offered by your company and/or other companies that the BFR must be predicated on:

- Negotiating an interconnection agreement or a traffic exchange agreement. The LNP rules do not include such a requirement. Service Provider LNP is merely a service that allows customers to retain their telephone number in the same location when switching providers and does not change existing network configurations for call rating and routing. No interconnection or traffic exchange agreement is necessary and more importantly, is not required. Verizon Wireless is willing to negotiate a service level agreement ("SLA") or other document to govern the porting activity and is in the process of contacting carriers for that purpose.
- Resolution of pending issues before the FCC regarding rate center issues, local network configurations, porting intervals, and any other remaining operational issues. Although Verizon Wireless believes that these issues will be resolved well before the November 24, 2003 deadline for wireless portability, resolution is not required for issuance of the BFR and compliance is not excused during the FCC's deliberations.

Verizon Wireless expects that you will comply with the FCC's rules and honor its BFR when customers seek to port their numbers to Verizon Wireless on or after November 24, 2003. Verizon Wireless will pursue all legal or enforcement remedies before the FCC if your company refuses to provide LNP with Verizon Wireless on or after November 24, 2003 deadline.

A handwritten signature in cursive script that reads "Bonnie Petti".

Bonnie Petti
Network Operations Headquarters Staff

cc John T. Scott, Deputy General Counsel

⁹ The timeframes for conversion to LNP of any additional switches are governed by the FCC's rules and range from 30 days to 180 days, depending upon the status of the switches (i.e., equipped remote, hardwired, or capable). Equipped remote switches require no hardware, and non-capable (i.e., hardwired) switches require hardware. 47 C.F.R. § 52.23 (b)(2)(vii)(A), (D).

Centurytel (See attached for list of legal entity names)
Attn: Guy Miller, Corporate Director Carrier Relations
100 Centurytel Drive, PO Box 4065
Monroe, LA, 71211

Mr. Miller,

Verizon Wireless has begun offering subscribers Local Number Portability ("LNP"), effective November 24, 2003.¹ Verizon Wireless will, additionally, make LNP available in non-Top 100 Metropolitan Statistical Areas (MSAs) not presently available, effective May 24, 2004. This LNP is consistent with Federal Communications Commission (FCC) rules and orders, per FCC Common Carrier docket CC 95-116. These rules and orders apply to Wireless and Wireline Carriers. This letter requests the various Centurytel companies make switches and NPA-NXXs available for number portability in locations where Verizon Wireless provides an overlapping coverage.²

Verizon Wireless has submitted a Bonafied Request Form (BFR), dated May 20, 2003, to Centurytel based on the Cellular Telecommunication & Internet Association (CTIA) implementation of the FCC rules. An example of the original format is enclosed. Based on the Centurytel implementation we provide an attached reformatted list, which will be provided in electronic format. The list identifies Centurytel companies, their switches and NPA-NXXs where Verizon Wireless provides overlapping coverage and identifies locations that are presently both LNP capable and not-LNP capable.

Upon receipt and verification of this reformatted Bonafide Request, Verizon Wireless requests that all of these commonly licensed areas, NPA-NXXs and switch CLLIs are provisioned for LNP service.

We request that you acknowledge receipt of this Bonafied Request. To facilitate this request, please review and indicate compilation errors or omissions. For locations that are not LNP capable, please indicate the date that the switch, the NPA-NXX or the NPA-NXX 1000s block will be LNP capable. Please arrange to return the attached form to the undersigned Verizon Wireless contact within 10 days. Please call the undersigned with any questions or concerns.

A handwritten signature in cursive script, appearing to read "Linda Godfrey".

Bonafide Request Form (BFR)

Purpose:

The purpose of this letter is to request the deployment of long-term Local Number Portability as defined by the FCC. Specifically, this form requests that **ALL** codes serving the Metropolitan Statistical Areas be opened for portability in the LERG and the NPAC and **ALL** switches serving these areas are LNP capable.

TO (RECIPIENT):

Attached to Verizon Wireless Reformatted BFR
to Centurytel Companies

This list is in order per OCN number of Centurytel Company. Of the total Centurytel Companies, 8 are not listed. This is due to the fact that Verizon Wireless does not have an overlapping service coverage. These 8 are.

Centurytel of Chester, Inc ,
 Centurytel of Northwest Arkansas, LLC (Siloam Springs),
 Centurytel of Arkansas, Inc.,
 Centurytel of Mountain Home, Inc ,
 Centurytel of Redfield, Inc ,
 Centurytel of Inter Island, Inc ,
 Centurytel of Central Missouri and
 Centurytel of Southern Missouri.

Columns

Column 1 – OCN	The Operating Company Number
Column 2 – OCN_Name	The Operating Company Name per LERG
Column 3 – ST	The Company State per LERG table 1
Column 4 – LATA NAME	The LATA associated with the Rate Center
Column 5 – Switch	The Common Language Location Identification of the Centurytel Centurytel Switch or Remote that serves the NPA-NXX or 1000s block
Column 6 – NPA	The Number Plan Area (NPA) code of the NXX
Column 7 – NXX	The NXX number series associated with the Rate Center
Column 8 – BLK	The 1000s series associated with the Centurytel switch or 'A', which indicated Centurytel is the responsible code holder for the NXX
Column 9 – Prtbl	Indicates NPA-NXX or NXX 1000s block that is already portable (Y) or not presently portable (N).
Column 10 – Date LNP Capable	This is reserved for Centurytel to input the date that the switch, NPA-NXX or 1000s block will be LNP capable.
Column 11 – Centurytel_RateCtr	This is the Centurytel Rate Center identified with the NPA-NXX.
Column 12 – RC State	The state in which the Centurytel Rate Center is located.
Column 13 – AOCN	The Centurytel Administrative Operating Company Number (AOCN) associated with the NPA-NXX or 1000s block
Column 14 – VZW RateCtr	The Verizon Wireless licensed coverage rate center.
Column 15 – MSA RSA NAME	The Metropolitan Statistical Area (MSA) or Rural Serving Area (RSA) name associated with the county/parish wherein Verizon Wireless provides service coverage. RSAs are identified by a state abbreviation and a number. MSAs are identified by name. No indication is made to distinguish Top100 MSAs from non-Top100 MSAs.

Re Wireline-Wireless Local Number Portability Agreement

Dear Robert Healea

Verizon Wireless would like to establish an Intercarrier Communications Process (ICP) for porting of numbers between Verizon Wireless and Crockett Telephone Co , Inc . We need to reach agreement quickly given the pending FCC deadline

Attached is a proposed service level agreement which we believe will facilitate quick, reliable, and seamless porting for our respective customers

Please let me know your availability, so that we can set a time for a meeting Please direct your response to our single point of contact, Sharon Cañas, who can be reached at 925-279-6122 or Sharon.Canas@VerizonWireless.com I look forward to working with you to develop an efficient and effective intercarrier porting process between Verizon Wireless and Crockett Telephone Co , Inc .

Thank you for your immediate attention to our request

Sincerely,

for *dd selay*
Bonnie R. Petti

Bonafide Request Form (BFR)

Purpose:

The purpose of this letter is to request the deployment of long-term Local Number Portability as defined by the FCC. Specifically, this form requests that **ALL** codes serving the Metropolitan Statistical Areas be opened for portability in the LERG and the NPAC and **ALL** switches serving these areas are LNP capable.

Attn: H Bivens,

Consistent with the rules of the Federal Communications Commission ("FCC"), on November 24, 2003, Verizon Wireless will begin competitive porting by offering customers local number portability ("LNP")¹. The FCC sought to simplify the task of identifying the switches in each MSA in which number portability is deployed to facilitate competitive entry.² Thus, the FCC's rules require local exchange carriers to make available, upon request by any interested party, a list of their switches for which provisioning of number portability has been requested (and therefore provided) and a list of their switches for which provisioning of number portability has not been requested.³

Verizon Wireless has reviewed our commonly licensed areas and has found the following switches and NPA-NXXs not LNP capable. Upon receipt and verification of the attached Bonafide Request, Verizon Wireless requests that all of these commonly licensed areas, NPA-NXX and switch CLLIs are provisioned for LNP service. The timeframes for conversion to LNP of any additional switches are governed by the FCC's rules and range from 30 days to 180 days, depending upon the status of the switches.

To facilitate this request, please review and list any additional switches and NPA-NXXs serving those rate centers listed on the attached form that are not LNP capable and by what date these will be LNP capable. In addition, for those switches that are not LNP capable, please indicate the status of the switch using the categories developed by the FCC in its rules (i.e., equipped remote, hardware capable, capable switches requiring hardware, and non-capable).⁴ Please review and correct, if necessary the carrier name listed on the Bonafide Request. We request that you acknowledge receipt of this Bonafied Request and arrange to complete and return the attached form to the undersigned contact for Verizon Wireless within 10 days. Please call the undersigned with any questions or concerns.

Attn: Vinnie Neal,

Consistent with the rules of the Federal Communications Commission ("FCC"), on November 24, 2003, Verizon Wireless will begin competitive porting by offering customers local number portability ("LNP")¹⁸¹. The FCC sought to simplify the task of identifying the switches in each MSA in which number portability is deployed and to facilitate competitive entry¹⁸². The FCC's rules require local exchange carriers to make available, upon request by any interested party, a list of their switches for which provisioning of number portability has been requested (and therefore provided) and a list of their switches for which provisioning of number portability has not been requested¹⁸³. Verizon Wireless requires only a list of switches and NPA-NXX codes for which provisioning of LNP has not been requested.

Verizon Wireless has simplified this request by attaching a form containing a list of switches and codes for your review. This list was derived by using the LERG and comparing it to Verizon Wireless's licensed service areas. The list identifies the switch CLLI and NPA-NXX codes that Verizon Wireless believes are not yet LNP capable. Please review and update the attached form, making any necessary changes or additions to the list regarding switches and codes that have not been marked portable. Please indicate the date by which the switch and codes will be LNP capable¹⁸⁴. Any comments can be made in the column provided on the form.

Verizon Wireless requests that you review, update and return the attached form to the undersigned contact within 10 days of receipt. Please call the undersigned with any questions or concerns.

Attn William Newton,

Consistent with the rules of the Federal Communications Commission ("FCC"), on November 24, 2003, Verizon Wireless will begin competitive porting by offering customers local number portability ("LNP")¹ The FCC sought to simplify the task of identifying the switches in each MSA in which number portability is deployed to facilitate competitive entry² Thus, the FCC's rules require local exchange carriers to make available, upon request by any interested party, a list of their switches for which provisioning of number portability has been requested (and therefore provided) and a list of their switches for which provisioning of number portability has not been requested³

Verizon Wireless has reviewed our commonly licensed areas and has found the following switches and NPA-NXXs not LNP capable Upon receipt and verification of the attached Bonafide Request, Verizon Wireless requests that all of these commonly licensed areas, NPA-NXX and switch CLLIs are provisioned for LNP service The timeframes for conversion to LNP of any additional switches are governed by the FCC's rules and range from 30 days to 180 days, depending upon the status of the switches.

To facilitate this request, please review and list any additional switches and NPA-NXXs serving those rate centers listed on the attached form that are not LNP capable and by what date these will be LNP capable In addition, for those switches that are not LNP capable, please indicate the status of the switch using the categories developed by the FCC in its rules (*i.e.*, equipped remote, hardware capable, capable switches requiring hardware, and non-capable)⁴ Please review and correct, if necessary the carrier name listed on the Bonafide Request We request that you acknowledge receipt of this Bonafied Request and arrange to complete and return the attached form to the undersigned contact for Verizon Wireless within 10 days Please call the undersigned with any questions or concerns

Attn: Lisa Ball,

Consistent with the rules of the Federal Communications Commission ("FCC"), on November 24, 2003, Verizon Wireless will begin competitive porting by offering customers local number portability ("LNP").⁹³ The FCC sought to simplify the task of identifying the switches in each MSA in which number portability is deployed and to facilitate competitive entry.⁹⁴ The FCC's rules require local exchange carriers to make available, upon request by any interested party, a list of their switches for which provisioning of number portability has been requested (and therefore provided) and a list of their switches for which provisioning of number portability has not been requested.⁹⁵ Verizon Wireless requires only a list of switches and NPA-NXX codes for which provisioning of LNP has not been requested.

Verizon Wireless has simplified this request by attaching a form containing a list of switches and codes for your review. This list was derived by using the LERG and comparing it to Verizon Wireless's licensed service areas. The list identifies the switch CLLI and NPA-NXX codes that Verizon Wireless believes are not yet LNP capable. Please review and update the attached form, making any necessary changes or additions to the list regarding switches and codes that have not been marked portable. Please indicate the date by which the switch and codes will be LNP capable.⁹⁶ Any comments can be made in the column provided on the form.

Verizon Wireless requests that you review, update and return the attached form to the undersigned contact within 10 days of receipt. Please call the undersigned with any questions or concerns.

Attn: Sam Anderson,

Consistent with the rules of the Federal Communications Commission ("FCC"), on November 24, 2003, Verizon Wireless will begin competitive porting by offering customers local number portability ("LNP")¹. The FCC sought to simplify the task of identifying the switches in each MSA in which number portability is deployed to facilitate competitive entry². Thus, the FCC's rules require local exchange carriers to make available, upon request by any interested party, a list of their switches for which provisioning of number portability has been requested (and therefore provided) and a list of their switches for which provisioning of number portability has not been requested³.

Verizon Wireless has reviewed our commonly licensed areas and has found the following switches and NPA-NXXs not LNP capable. Upon receipt and verification of the attached Bonafide Request, Verizon Wireless requests that all of these commonly licensed areas, NPA-NXX and switch CLLIs are provisioned for LNP service. The timeframes for conversion to LNP of any additional switches are governed by the FCC's rules and range from 30 days to 180 days, depending upon the status of the switches.

To facilitate this request, please review and list any additional switches and NPA-NXXs serving those rate centers listed on the attached form that are not LNP capable and by what date these will be LNP capable. In addition, for those switches that are not LNP capable, please indicate the status of the switch using the categories developed by the FCC in its rules (i.e., equipped remote, hardware capable, capable switches requiring hardware, and non-capable)⁴. Please review and correct, if necessary the carrier name listed on the Bonafide Request. We request that you acknowledge receipt of this Bonafide Request and arrange to complete and return the attached form to the undersigned contact for Verizon Wireless within 10 days. Please call the undersigned with any questions or concerns.

Attn: Herbert Bivens,

Consistent with the rules of the Federal Communications Commission ("FCC"), on November 24, 2003, Verizon Wireless will begin competitive porting by offering customers local number portability ("LNP").²²¹ The FCC sought to simplify the task of identifying the switches in each MSA in which number portability is deployed and to facilitate competitive entry.²²² The FCC's rules require local exchange carriers to make available, upon request by any interested party, a list of their switches for which provisioning of number portability has been requested (and therefore provided) and a list of their switches for which provisioning of number portability has not been requested.²²³ Verizon Wireless requires only a list of switches and NPA-NXX codes for which provisioning of LNP has not been requested.

Verizon Wireless has simplified this request by attaching a form containing a list of switches and codes for your review. This list was derived by using the LERG and comparing it to Verizon Wireless's licensed service areas. The list identifies the switch CLLI and NPA-NXX codes that Verizon Wireless believes are not yet LNP capable. Please review and update the attached form, making any necessary changes or additions to the list regarding switches and codes that have not been marked portable. Please indicate the date by which the switch and codes will be LNP capable.²²⁴ Any comments can be made in the column provided on the form.

Verizon Wireless requests that you review, update and return the attached form to the undersigned contact within 10 days of receipt. Please call the undersigned with any questions or concerns.
